

BarTracks™ Sample Reports

BarTracks™ makes reporting simple and fast!

It has a very powerful capability for creating custom reports. And it does not require writing complicated query language.

Reports can quickly and easily provide answers to questions like these:

- ❖ Where are the 25 “Desk-Wood” Assets purchased on Purchase Order 97-02537-092? What Condition are they in?
- ❖ Where are there “Bed-Double” Assets in Room Type “Visitor” in Building 703 between Rooms 200 and 499 (Second through Fourth Floor)?
- ❖ What is the Current (Depreciated) value of all the Assets in Room 117 of Building 401? What is their Condition?
- ❖ Which Assets have been sent to Repair? When? Which Repair Facilities are they in?
- ❖ What is the Inventory of Building 17 Room 25? Rooms 1-55? For these Inventories, what is the original Purchase Cost? Current Value?
- ❖ Which Assets will have their Warranties expire in the next 30 days? Where are they? Can the list be sorted by Building and Room Number?

Every report is created using a two tab Select and Sort form. Basic Asset Details are on the first tab, as shown below. Most questions can be answered, and most useful reports, can be generated using this form.

Basic
Select and Sort
Form

The Advanced / Accounting Details are on the second tab, shown below.

Advanced Select and Sort Form

With a combination of the Basic and Advanced Tabs, the User specifies what is to be included in a report and how it is to be sorted. “Point-and-pick” lists of Selection Criteria and Comparisons make it easy to set up the reports:

The **Selection Criteria** include all attributes of an Asset selected on the Basic Tab, such as Funding Type, and all the other Criteria on the Advanced dropdown list, as shown below. These are mostly “Accounting Details”.

Selection Criteria

Comparisons are shown in the dropdown list below:

	Selection Criteria	Comparison	Value 1
1.	Acquisition Date	(Click to Select)	
2.	(Click to Select)	(Click to Select)	
3.	(Click to Select)	Equals	
		Before or Less Than	
		After or Greater Than	
		Between	
		Not Between	

Comparisons

The combination of Selections on the Basic and Advanced Tabs, and the Comparisons on the Advanced Tab, produces extremely powerful reporting without technical difficulty for the User.

When reports are set up, whatever is selected will be included in the report, with choices of sorting order, and the BarTracks™ report comes out as requested.

If nothing is selected, every detail is reported.

It is easy to return to the Select and Sort form and modify the choices.

Reports appear on the screen exactly as they will print on paper. So most of the time, it is not really necessary to “print” any paper. If paper copies are needed, a standard Print Menu presents all the usual options. It is also easy to export the information from any report to Microsoft® Word or Excel.

So simple and easy!

The sample reports that follow are all based on using only the Basic Tab of the Select and Sort Forms.

For specific types of reports, including those that can be produced using the Accounting Details of the Advanced Tab, please contact Saltzer, Sutton & Endicott.
